A Korea-inspired Studio

Minimalist Design

Befriend Studio is the **First flexible space concept in Singapore** created by Lodge & Co. Flexible space concepts have been a popular trend in South Korea and Japan.

Our studio hopes to gather people together. In the past 3 years, we have detached from face-to-face interactions, while meetings are conducted via zoom, and conversations are now kept to a minimum. We hope to bridge the lack of communication gap by offering an extended list of activities.

Hence by popular demand, we have created a minimalist designed studio for you guys. We hope you guys like it!
